EDUCATION

Lovely Professional University

B.Tech, Computer Science and Engineering; CGPA: **7.85**

Phagwara, Punjab

Jul 2023 – Jul 2027

Coursework: Data Structures, Algorithms, Operating Systems, DBMS, Computer Networks, Object-Oriented Programming, Distributed Systems

EXPERIENCE

BizoGreat | Software Engineer Intern (Backend / Full Stack)

Nov 2025 – Feb 2026

- Built Express.js REST APIs over a normalized PostgreSQL schema for core ERP workflows, secured with JWT authentication and role-based access control.
- Cut API response latency by ~40% on high-traffic endpoints by rewriting N+1 query patterns and adding targeted composite indexes.
- Owned the full SDLC of a React.js operations dashboard, replacing manual spreadsheet workflows with a single self-service data view for internal stakeholders.
- Delivered in two-week Agile sprints with Git branching, pull-request review and CI checks across a 5-engineer team.

PROJECTS

Hospital Management System | Java 21, Spring Boot 3.5, PostgreSQL 17, Kafka, Docker, AWS EC2, k6 | GitHub Feb 2026 – Sep 2026

- Architected 6 Spring Boot microservices behind a Spring Cloud API Gateway with Eureka discovery, JWT token filtering, Feign service-to-service calls and database-per-service PostgreSQL; 9 containers orchestrated with Docker Compose on AWS EC2.
- Sustained **166 req/s for 10 minutes — 100,000 requests, 0 errors, p95 20.6 ms / p99 64.8 ms** — and a peak of **628 req/s** (377,165 requests, 0 errors) on a single 2-vCPU EC2 instance, load-tested by k6 from a dedicated generator EC2 with guard rails that flag generator-limited runs.
- Diagnosed a Kafka container healthcheck that forked a JVM every 10 s by correlating per-container CPU with request tails; replacing it with a TCP probe cut **p99 latency 555 ms → 65 ms (8.5×)** and dropped requests from 203 to 3.
- Eliminated double-booking with a 15-minute slot rule enforced by PostgreSQL advisory transaction locks: 200 concurrent booking attempts on one slot committed exactly 10 and rejected 190 cleanly, with zero conflicts.
- Hardened the gateway with fail-closed, relationship-aware authorization (role plus doctor–patient relationship checked per request, identity headers stripped and re-issued), verified by a 21-case negative-authorization suite passing 21/21.
- Instrumented HikariCP, Spring Actuator and `pg_stat_activity` telemetry to prove pool saturation (10/10 connections held, 7 threads queued) while the database sat idle, isolating open-session-in-view as the concurrency ceiling rather than DB throughput.

SwayPay — Payment and Ledger Engine | Spring Boot, PostgreSQL, Redis, React.js | GitHub

Jul 2026 – Present

- Modeled a double-entry ledger (Accounts, Transactions, LedgerEntries) in Spring Boot over PostgreSQL, exposed through 5 JWT-secured, role-scoped REST endpoints.
- Enforced request-level idempotency with Redis SETNX, guaranteeing exactly-once processing of duplicate and retried payment requests.
- Serialized concurrent transfers with `SELECT FOR UPDATE` pessimistic locks on both accounts inside `@Transactional` boundaries with rollback-triggering exceptions, eliminating partial writes.

TECHNICAL SKILLS

Languages: Java, C++, SQL, JavaScript, TypeScript

Backend: Spring Boot, Spring Cloud Gateway, REST APIs, Microservices, Eureka, Feign, JWT, Spring Security, Node.js, Express.js

Databases: PostgreSQL, MySQL, Redis, MongoDB, Schema Design, Query Optimization, Indexing, Transactions, Locking

Systems: Data Structures, Algorithms, OOP, Distributed Systems, Concurrency, Apache Kafka, Event-Driven Architecture, Fault Isolation, Scalability

Cloud & Tooling: AWS (EC2, VPC, Security Groups, Elastic IP, EBS), Docker, Docker Compose, Kubernetes, Terraform, Linux, Git, k6 Load Testing, Spring Actuator, Performance Profiling, Postman

Frontend: React.js, Redux, Next.js, TanStack Query

ACHIEVEMENTS & CERTIFICATIONS

Codeforces Rating 1251 (Pupil); 200+ LeetCode problems across Arrays, Trees, Graphs, DP and Greedy Since Aug 2025

Qualified Round 1, Google The Big Code 2026

Mar 2026

Ethical Hacking, NPTEL | Front-End Development, IBM

Nov 2025
